

# Best Flower Viewing for March 8, 2008

The hike up spectacular Borrego Palm Cyn. yields a wide variety of desert blooms. The Alternate Trail is particularly nice.

Coyote Canyon at the end of DiGiorgio Rd. is bursting with color in huge fields of wild-flowers!

Henderson Cyn. Rd. is still improving. See Sand verbena, dune evening primrose and desert lilly's.

Arroyo Salado is great for desert lilly.

The southern end of the park is a little behind the northern areas but Mt. Palm Springs has phacelia and brown-eyed primrose and nice stands of lupin are found approaching the Carrizo Overlook

Indian Cyn. is blooming. Four wheel drive only

Box Cyn. has fishhook cactus. and chia.
